Garden Health & Action Card Report

Generated: 2026-08-29 00:00:08

1. Agro-Climatic Plan Summary

Location	Lat 6.93, Lon 79.86
Container	grow_bag
Space	2.00 m²
Target month	9
Avg min temp	24.00 °C
Avg max temp	30.00 °C
Avg daylight	12.00 h/day

Top crop recommendations

Crop	Score	Layout	Notes
Gotukola	95	20 rows × 10 cols (200 plants)	Harvestable in ~45 days; Water roughly every 1 day(s)
Tomato	88	3 rows × 3 cols (9 plants)	Harvestable in ~75 days; Water roughly every 2 day(s)

2. Leaf Health Pathology Status

Crop detected	Tomato
Issue	Early Nitrogen Deficiency & Leaf Curl
Confidence	0.92
Severity	moderate
Symptoms	Older leaves turning pale green to yellow, Upward curling of young leaves, Stunted new growth
Recommended action	Apply a nitrogen-rich organic feed such as compost tea or banana-peel fertiliser; inspect undersides of leaves for pests.

3. Step-by-Step Organic Kitchen Remedy

General Compost Tea & Garlic-Chilli Protective Spray

Ingredients:

- 2 handfuls aged compost
- 1 litre water
- 2 cloves garlic
- 1 small chilli (optional)

Preparation:

1. Steep compost in water for 24-48 hours; strain.
2. Blend garlic and chilli with a little water.
3. Strain and mix into compost tea.

Application schedule: Soil drench every 10-14 days; foliar spray every 7 days as a preventive.

Safety notes:

- Wear gloves when handling chilli/garlic mixtures.
- Avoid spraying in direct sunlight.

4. Estimated Grocery Savings

Crop	Tomato
Expected yield	2.50 kg
Retail price	300.00 LKR/kg
Estimated savings	750.00 LKR
